

Geetha is a 14 year old girl who is very active in Social Networking sites.

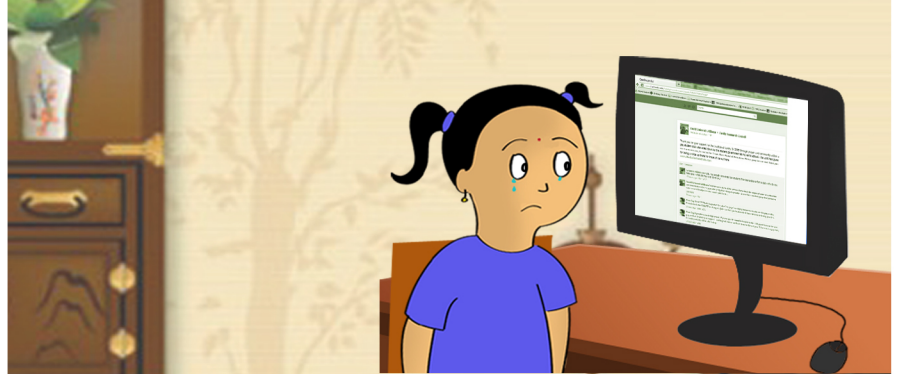

She used to post her personal photos and update her regular activities online.

One fine morning After having breakfast Geetha logs in her account

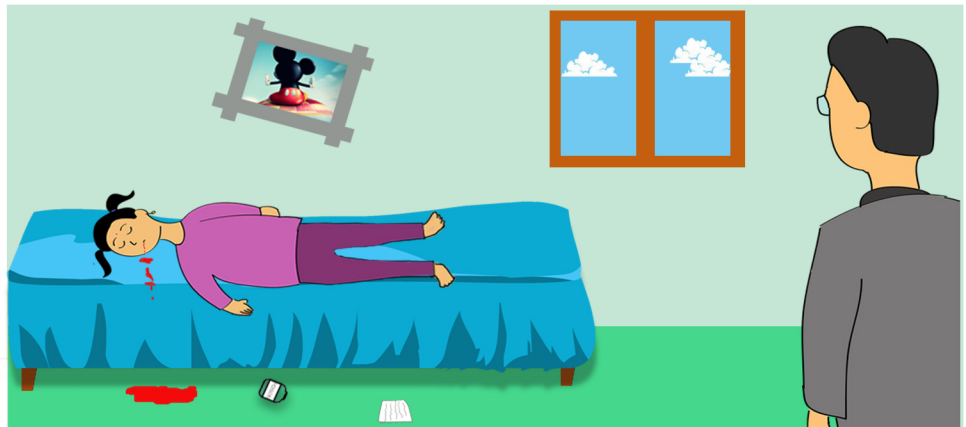

After logging in, she sees some posts subjected to brutal teases & abuses about her weight and she becomes very upset about her friends/public and friends of friends discussing regarding her weight in public as a debate

Geetha consulted a doctor about her weight issue, but doctor said there was no issue regarding her weight

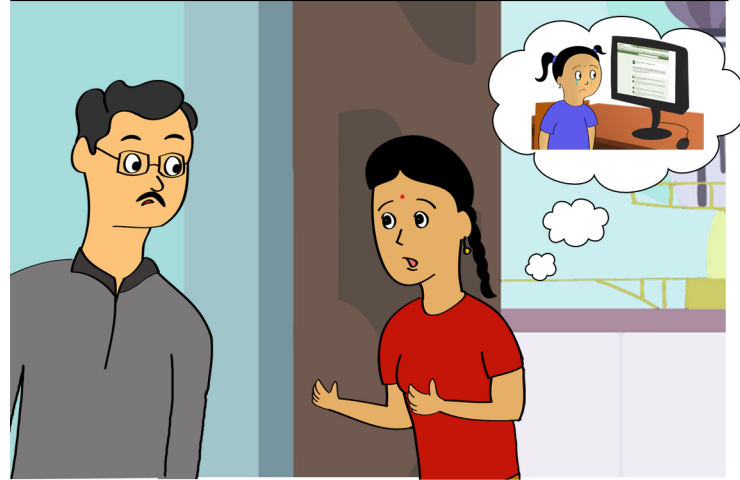

Her father tried to knock the door and call but no use....

After Geetha's death, her father found a note that read: "As I sit here day by day I wonder if its going to get better. I want to die, I want to be free. I can't live like this anymore. I'm not happy"

Following the suicide, Geetha's elder sister, Sita described the reason behind Geetha's death. She started receiving abusive messages on Social Networking sites regarding her weight from friends of friends and public, she was unable to stop or control and then she took this step

Tips:

1. Take advantage of the security/privacy settings available in your Social Networking sites.
2. If any suspicious things happening with you immediately you should contact with your parents.
3. If you find any anonymous messages posted, report to concerned site authorities.
